

Andrew Doni Assis de Souza

Objective:

To work in the **Information Technology** field, focusing on **software architecture, infrastructure, automation, artificial intelligence, and B2B solutions**, applying knowledge in software development, Linux, servers, containers, and engineering best practices to build efficient, scalable, and reliable systems.

Professional Summary:

Software Engineer focused on infrastructure, server architecture, production environments, and B2B solutions, with strong logical reasoning, systemic thinking, and hands-on experience in complex technological environments. Founder of Docalli, working with Linux, VPS, Docker, Nginx, process automation, artificial intelligence, observability, and backend development, bridging software and infrastructure to deliver robust, production-ready systems. Proactive, results-driven professional with a high learning capacity, able to work across different technical contexts and directly contribute to the evolution of products and technological processes.

Professional Experience:

Founder & Software Engineer, Docalli

September 2025, Present

- Founded and operate a B2B solutions company, combining software development, infrastructure, and automation.
- Built a full institutional site, from frontend to backend, with a custom FastAPI API, PostgreSQL, and security layers (rate limiting, email validation, bot protection with Cloudflare Turnstile).
- Developed AI agents and automations for real clients, including WhatsApp customer service and internal process automation, already in production.

Maintenance Assistant, Eletrofire do Brasil

June 2024, Present

- Perform corrective and preventive maintenance on SDAI systems (Fire Detection and Alarm System), ensuring full operation of all devices.
- Support inspections with the Fire Department for system approval and authorization.
- On-call support for condominium clients, resolving alarms and system failures and restoring standard operation.
- Act as a technical reference within the team, providing support and guidance for system-related questions and issues.
- Contributed directly to company growth, increasing active contracts from 60 to 150, strengthening the company's presence in the SDAI sector.

Education:

FAESA, Bachelor's Degree in Computer Science (in progress)

February 2025, Present

SENAI, Technical Course in Electrotechnics

April 2023, December 2024

Ary Parreiras, High School Diploma

February 2021, December 2023

Projects:

- **Átrio**, Conversational enterprise RAG that centralizes company knowledge in a self-updating vector database and operates Google Workspace right from the chat. (Python, FastAPI, pgvector)
- **WhatsApp AI Salesperson**, AI agent that handles WhatsApp 24/7, checks catalog and prices in real time, and closes orders. In production, used by real clients. (n8n, Evolution API, Redis)
- **Notice Automation**, Automation that notifies clients about scheduled maintenance on its own, every day, with zero human intervention. In production. (n8n, Google Workspace, Gmail)
- **Docalli**, Full institutional site, from frontend to backend, with a custom API and security layers. In production. (React, FastAPI, PostgreSQL)
- **Troco**, Financial monitoring app built around an AI accessible through WhatsApp. (Flutter, Dart)
- **Gestok**, Inventory management system, a study project to deepen Java and Spring Boot skills. (Java, Spring Boot, PostgreSQL)

Technical Skills:

- Programming Languages: Java, Dart, Python, JavaScript;
- Frameworks: Spring Boot, Flutter, FastAPI, React, Next.js;
- Databases: PostgreSQL, pgvector, Redis;
- Infrastructure: Linux, Docker, Docker Compose, Nginx (proxy), DNS and domains, GitHub Actions, Cloudflare, Turnstile;
- AI and automation: RAG, API integration, n8n, process automation;
- Tools: Git, GitHub, Postman, Claude Code;
- Office Suite: Word (intermediate), Excel (intermediate), PowerPoint (basic);
- Strong ability to understand system behavior and technical interfaces quickly.

Soft Skills:

- Excellent customer service
- Problem-solving and technical support
- Teamwork and internal technical reference
- Proactivity and fast learning

Additional Information:

Driver's License (AB, car and motorcycle)

English Proficiency: C2, EF SET Certificate (December 2022)
